

TaHoma® switch

Switch your home in one touch.

The 1st smart control to centralise & connect your home equipment.

somfy®

Make the most of **your home**

Installing motorised shutters, blinds, awnings or gates is the first step to making life at home more comfortable and convenient. By adding a touch of connectivity, a world of possibilities opens to you.

Somfy's connected equipment helps you make the most of your home. TaHoma switch frees you from repetitive, mundane tasks and adds new features to your home. Enrich your daily experience to focus on what you love.

No more wasting time

“Rushing through the whole house to close or switch off all your equipment is such a waste of time! I really need a solution that quickly centralises everything for me.”

Joe

Greater peace of mind

“When I leave home, I often wonder if I have forgotten to switch off the lights or activate the alarm. I want technology that fits my lifestyle — and not the other way around — to help protect my home and bring me peace of mind.”

Matilda

Create your own routines & launch them **in one touch**

TaHoma switch is a smart control, offering 2 personalised scene launcher buttons to centralise your home equipment. Customise each button based on your devices to create scenes that fit your daily routines.

Make it your own! >>>

Leaving & coming back home

Customised
scene |

Leaving home:
the quickest,
easiest way.

When rushing out the door in the morning, simply touch the “Going Out” scene button you have programmed: The rolling shutters come down, the garage door opens, and you can head off to work in total peace of mind.

Customised
scene ||

Coming home:
a welcoming home
in one touch.

What a relief to come home after a long day at the office and be able to relax right away, hassle-free! Simply touch the second scene button to open all the rolling shutters and turn the lights on from the hallway or main room.

Can also be controlled
automatically, with a
smartphone or a voice
assistant*.

Take it a step further:
add an alarm for greater
peace of mind.
Easily connect any
compatible alarm
to your system. If
someone tries to break
in, you receive an alert
on your phone, your
shutters close automa-
tically, and the outdoor
lighting turns on.

Take it a step further: add a smart thermostat for greater energy efficiency.

The temperature automatically adjusts to your daily life, with comfort mode when you're home and eco mode at night or when you're away.

Day & night

Customised scene |

Start the day right with a “Good Morning” scene

With the touch of a button, activate the “Good Morning” scene and watch your home awaken: the rolling shutters open and the lighting adjusts just as you programmed it. Simple and practical.

Customised scene ||

Head off to bed with a “Goodnight” scene

In one touch, the shutters close and the lights turn off.

Can also be controlled automatically, with a smartphone or a voice assistant*.

Evenings indoors & out

Customised scene |

Private and comfortable

Instantly create the atmosphere of your choice by launching your scene. TaHoma switch lowers your blinds, dims your lights and plays your favourite playlist to help you unwind.

Customised scene ||

Warm and inviting

Enjoy a cosy evening with friends on your terrace. With one touch roll out the awning, switch on the outdoor lights and put on your preferred music.

Take it a step further:
Presence simulation.

Going away on vacation? Simply create the illusion that you haven't left home by using presence simulation: a special scene that turns lights on and off and opens and closes your shutters or blinds at set times.

3 ways to control your devices

With the smart control
Launch your daily routines in one touch.

With the TaHoma app
Program and control your devices from home, away or automatically.

With a voice assistant*
When your hands are full and from your car.

Ask it and it's done!

“My guests have arrived early and I still haven't finished getting everything ready for dinner! I simply ask my voice assistant “Can you open the gate?” and in they come.”

James

Compatible with:

* Requires an additional voice assistant (availability depending on countries)

Control your connected home, anytime & anywhere

Control your connected devices

- individually or as a group
- from home or away
- from the app or automatically

Get real-time information on your equipment's status
(for example, “on” or “off”, “open” or “closed”)
